

## Georgia Benefits From 28,000 New Kinetic Fiber Builds

August 5, 2026 1:30 PM EDT

- Rapid Q2 2026 expansion benefits communities and customers by enabling remote work, gaming, streaming, agriculture and telehealth
- 141,000 new Kinetic fiber locations added across its 18-state footprint in Q2

CANTON, Ga., Aug. 05, 2026 (GLOBE NEWSWIRE) -- Kinetic today announced a major broadband expansion in Georgia, delivering multi-gig fiber internet to more than 28,000 additional homes across more than 140 communities in the second quarter of 2026. The expansion highlights Kinetic's commitment to deliver better technology, at a better value, for customers.

According to Ookla's 2026 H1 Speedtest data, Kinetic delivers "the fastest download speeds" in Hiawassee, Lumpkin County, Pickens County, Towns County, and Union County.\*

In the second quarter of 2026, Kinetic added fiber locations in Valdosta, Lumpkin, Homerville, Rincon, Lake Park, Canton, Moultrie, Winder, Dalton, Trion, and more. A portion of these locations were built with the support of American Rescue Plan Act funding in partnership with the counties and the State of Georgia.

"Kinetic has great service, quick and friendly installation. I had no problems at all, and it's a heck of a lot cheaper than our last service provider with higher quality service," said Kevin Peppers, a Kinetic customer in Canton.

To date, more than 429,000 locations across the Peach State have access to Kinetic's high-speed, next-generation connectivity.

[Research](#) shows that fiber-connected communities experience 213% higher business growth, 10% higher self-employment and a [14-17%](#) increase in home values. Fiber is also significantly more sustainable than copper cables and uses up to [95% less energy per gigabit](#). It requires less maintenance over time, which reduces environmental impacts and community disruptions.

"Fast, reliable fiber internet is more important than ever; it can change the way people live, work and learn in today's digital world. Better connectivity can create new opportunities in communities of every size, and we're committed to delivering it," said Stacy Hale, Kinetic's state operations president. "Our focus is on building strong, future-ready infrastructure that helps residents, businesses and families stay connected and succeed for years to come."

Kinetic fiber customers can benefit from seamless 4K+ streaming across multiple devices with no data caps and no usage charges. Multi-gigabit connections support remote work, online learning and low-latency gaming and, through partnerships with YouTube TV, AT&T for wireless bundles, and eero, an Amazon company, households and businesses receive a unified high-performance connectivity experience.

More Georgia residents and businesses now have access to:

- [Wi-Fi 7](#) – The newest, most advanced secure connection with equipment from manufacturers like eero, an Amazon company. Wi-Fi 7 delivers faster speeds and lower latency and supports up to 200+ connected devices at the same time, creating a better internet experience with wall-to-wall coverage and less tech stress.
- [Whole-Home Wi-Fi Set-Up](#) – Professional new fiber installs coupled with the **Kinetic Promise**<sup>™</sup>, which is a pledge that technicians will not leave the home until Wi-Fi works in every area and on every device where needed.
- [YouTube TV Bundle](#) – New bundle gives eligible Kinetic customers a \$10 per month discount for up to 12 months\*\* when they pair YouTube TV with their high-speed internet packages.

Kinetic, recently named *CNET's* Best Rural Fiber Internet Provider in 2026, has approximately 11.7 million fiber strand miles and approximately 2.1 million homes passed to date across its 18-state footprint.

"As we invest in communities and grow our fiber-optic network, we're reaching more areas faster with award-winning technology to help people stay connected to what matters most, build businesses, work online and access new opportunities," said Hale.
