NON-GAAP FINANCIAL MEASURES

While we believe that net income, as defined by GAAP, is the most appropriate earnings measure, we also believe that FFO, AFFO, EBITDA and Adjusted EBITDA are important non-GAAP supplemental measures of operating performance of a real estate investment trust ("REIT").

Historical cost accounting for real estate assets implicitly assumes that the value of the real estate diminishes predictably over time. However, since real estate values have historically risen or fallen with market conditions, presentations of operating results for a REIT that use historical cost accounting could be less informative. Thus, NAREIT created Funds From Operations, or "FFO", as a supplemental measure of operating performance for REIT's that excludes historical cost depreciation and amortization, among other items, from net income, as defined by GAAP. The Company uses the NAREIT definition of FFO. NAREIT defines FFO as net income applicable to common shareholders (computed in accordance with GAAP) excluding gains or losses from real estate dispositions, plus real estate depreciation and amortization and impairment changes.

The Company defines Adjusted Funds From Operations, or "AFFO", as FFO excluding (i) non-cash revenues and expenses such as stock-based compensation expense, amortization of debt discounts, amortization of deferred financing costs, amortization of intangible assets, straight line rental revenues, revenue associated with the amortization of tenant funded capital improvements and (ii) the impact, which may be recurring in nature, of acquisition and transaction related expenses, the write-off of unamortized deferred financing fees, additional costs incurred as a result of early repayment of debt, changes in the fair value of contingent consideration and financial instruments and similar items. We

believe that the use of FFO and AFFO, combined with the required GAAP presentations, improves the understanding of operating results of REITs among investors and analysts, and makes comparisons of operating results among such companies more meaningful. We consider FFO and AFFO to be useful measures for reviewing comparative operating and financial performance. In particular, we believe AFFO, by excluding certain revenue and expense items, can help investors compare our operating performance between periods and to other REITs on a consistent basis without having to account for differences caused by unanticipated items and events, such as acquisition and transaction related costs. However, FFO and AFFO do not purport to be indicative of cash available to fund our future cash requirements.

We define EBITDA as net income, as defined by GAAP, before interest, taxes, depreciation and amortization. Adjusted EBITDA represents EBITDA, excluding gains or losses on the early repayment of debt, acquisition and transaction related expenses, net gains on real estate activity, changes in the fair value of financial instruments and other identified revenues and expenses. We believe EBITDA and Adjusted EBITDA are important supplemental measures to net income because they provide additional information to evaluate our operating performance on an unleveraged basis, and serve as an indicator of our ability to service debt. Adjusted EBITDA is calculated similar to defined terms in our material debt agreements used to determine compliance with specific financial covenants.

Annualized Adjusted EBITDA is calculated by dividing Adjusted EBITDA for the reported period by 92 days and 160 days for the three months ended September 30, 2015 and the period April 24 to September 30, 2015, respectively, and multiplying it by 365 days. Our computation of Adjusted EBITDA and Annualized Adjusted EBITDA may differ from the methodology used by other REITs to calculate these measures, and, therefore, may not be comparable to such other REITs. Annualized Adjusted EBITDA has not been prepared on a proforma basis in accordance with Article 11 of Regulation S-X.

Our computations of EBITDA, Adjusted EBITDA, FFO and AFFO may not be comparable to that reported by other REITs or companies that do not define FFO in accordance with the current NAREIT definition or define EBITDA, Adjusted EBITDA, and AFFO differently than we do.
